### WHY THE STUDENTS SHOULD PREFER CIVIL ENGINEERING OVER OTHER BRANCHES

#### WHY CIVIL ENGINEERING :-

- Gives Satisfaction.
- Those finding Civil Engineering boring and not appealing should listen to Institution of Civil Engineering president's address and should follow its website.
- It is said that engineers today work in isolation/silos (of different branches). It is not like Civil, Mechanical, Electrical work in isolation from one another. There are subjects which are common to many branches of engineering.
- The civil engineering profession requires the engineer to see something which is invisible to the naked eye. Eg., on a piece of land residential complex, dam, airport etc. can be developed. Can this be done by a Common Man? No. It requires a vision to realize that today it is simply a piece of land and tomorrow some structure will be created on this land.
- Civil Engineers are strategic thinkers. Most Civil engineers are leaders because they lead an entire team. If one is constructing a building etc. it can't be done alone. You need a team of many people. It can be imagined how many companies, financial and other institutions one has to interact with. Common men cannot do this. If you think you are uncommon, welcome to civil engineers' club.
- Sustainability is the main focus of civil engineers, how to give back to the earth whatever you have taken. This is the main philosophy.
